

NHospitality WiFi Users Management

NHospitality WiFi Users Management menghandle masalah yang dihadapi management Wifi untuk lokasi yang besar seperti Hotel.

- Tanpa kontrol pemakaian, Internet menjadi lambat, karena dipakai user yang bukan tamu hotel.
- Simple Kontrol :
 - Tamu menjadi tidak nyaman karena harus login lagi bila kembali ke hotel.
 - Password harus diganti manual secara rutin, dan sering tidak terkoordinasi dengan baik, sehingga tamu kadang tidak bisa login, atau/dan user yang tidak berkepentingan bisa pakai.

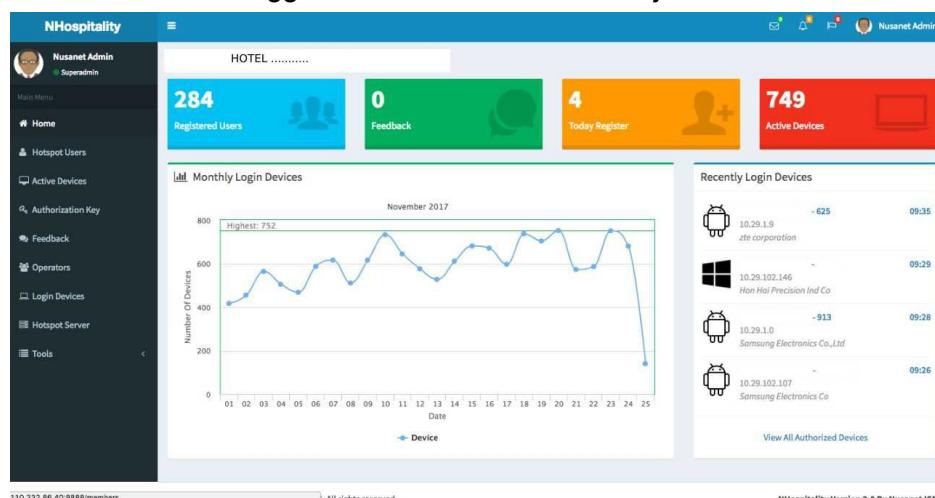

Fitur NHospitality:

1. Kenyamanan User :

- a. User tidak perlu bolak balik login, hanya perlu login saat checkin dan tidak perlu lagi hingga tamu checkout
- b. User name bisa menggunakan nomor kamar dan password menggunakan Firstname Tamu, sehingga gampang diingat Tamu dan gampang dikomunikasikan.

2. Kenyamanan Management:

- a. Web Interface sehingga bisa diakses darimana saja.

- b. Dashboard user WiFi : Management dan IT bisa mengetahui jumlah user pemakai WiFi
